

Jedi Mind Tricks Lyrics

"Geometry In Static (Interlude)"

"The way in which you destroy an opponent is getting him to destroy himself by dividing his ranks against one another."

"Then you feed both sides, you have agents feeding both sides, inflaming both sides, and they kill each other off. It's time that some of us woke up to this reality, to understand that people who try to maintain empires and create empires do it by manipulating the people they're trying to conquer."
